

N.S. Consultant : Company Overview

N.S. Consultant is a company that provides services in IT and TLC fields, with a great experience dedicated on providing products and services to Oil&Gas industry. N.S.Consultant was born only in 2006 while the world economy and the italian one have been involved in big changes. N.S. Consultant is the result of all the experienced done by the two brothers Marco e Andrea with different companies such as ENI, Stargas (ex SPI), SPI, Albacom, RCS Rizzoli, IBM, Hewlett Packard, Compaq and Packard bell. Working with the Oil&Gas industry it became a priority the need to work in some of the farther and dangerous places in the world. For that reason we have acquired and tested the problem solving skill and research for the best solution along years. N.S. Consultant arranges an expert and highly specialized team of people in order to respond to our growing and their requests. The width range of solutions provided by N.S. Consultant let the Oil&Gas company to manage their sensible data and all the IT infrastructure, this can raise up the QoS for the internal communication to have fastest decision making and then a cost reduction.

N.S. Consultant : Job Centre

N.S. Consultant is in Cesano Boscone, at the borders with Milan and the personnel is italian. However due to the experienced done overseas and in order to stay always on the top it is a MUST the knowledge of the english language. Thanks to that it is possible to interact with one language rather than the other. The strategic location of N.S. Consultant near the Tangenziale Ovest lets catch up easily every destination in Milan and province. The advantage of rapid movements represents a good versatility when a direct contact with customer is required or in event of interventation is need. This choice was done in order to follow up customers purposes and job developments.
